The sea tour will cover:

- Terminal Operations
- Bunkering Operations
- Pulau Bukom Terminal Operations
- Maritime Technology
- Maritime Security
- Offshore Oilrig Construction

4th Singapore Maritime Lecture

Date: Mon 26 April

Time: 2.30pm – 4.30pm

Venue: Fullerton Singapore

Launched in 2007, the Singapore Maritime Lecture (SML) attracts and engages thought leaders on a wide range of important maritime issues, one of the reasons why the Singapore Maritime Week initiative has made good progress in developing Singapore as a maritime thought capital and centre for major international maritime events.

This is the fourth year that the Maritime and Port Authority of Singapore is organising the lecture series which features prominent personalities sharing their thoughts and perspectives on issues of interest to the international maritime community.

The inaugural SML was delivered by Singapore's Minister Mentor Mr Lee Kuan Yew. The second SML was delivered by Secretary-General of the International Maritime Organization, Mr Efthimios E. Mitropoulos and BW offshore Chairman, Dr Helmut Sohmen delivered the third one.

The 4th Singapore Maritime Lecture, held during Singapore Maritime Week, will be delivered by Capt. Wei Jiafu, President and CEO of China Ocean Shipping (Group) Company (COSCO Group). He will present a keynote speech on China factors in relation to the shipping industry.

MARTECH 2010 Conference & Exhibition

27th April to 2nd May 2010

'New Frontiers'

- The **MARTECH** Conference is a biennial event organized with the objective of bringing maritime professionals and businesses to network and share experiences on the application and advancement of marine technology in shipping business.
- The conference is organized by the **Singapore Maritime Academy – Singapore Polytechnic and the Maritime and Port Authority of Singapore.**
- The first **MARTECH** conference was organized in September 1994 in conjunction with World Maritime Day. It was a half-day seminar during which 9 papers were presented. **MARTECH** has grown since then and has been organized for the first time during the **Singapore Maritime Week** with the theme '**New Frontiers**'. In this regard some of the papers presented at the conference will look at saving fuel, emission control technology, safety training, providing fast, safe and reliable water transport and safety management in Arctic waters.
- **32 papers** will be presented by maritime personnel from Sweden, Singapore, the United States, South Korea, Germany, Norway, Malaysia, India and Australia on subjects like Maritime Safety and Security, Simulator training and assessment, the control of greenhouse gas emissions (GHG) and new technology implementation in education.
- The keynote address will be on '**Clean Technology**'.
- SMA will use the event to launch its newly acquired **DP simulator** and the '**Wing in Ground**' **Pilots**, developed by Singapore Polytechnic. In addition the CoC Class 5 MEO E-Learning and the Maritime Environmental Awareness CBL will be rolled out.
- **11 companies** will showcase their products at the exhibition.
- **A shipboard workshop** is being held for delegates to observe the **current navigational situation** in the Singapore and Malacca Straits.

Sea Asia 2011 Launch Party, Reflections@Keppel

Event Synopsis

Over 150 guests will attend the *Sea Asia 2011* Launch Party at *Reflections@Keppel* and they include the key sponsors, exhibitors and key maritime players of the Singapore maritime community. The *Sea Asia* show is fast-becoming a flagship event of SMF. Through this show, SMF hopes to elevate Singapore's status as an international maritime centre and make Singapore the focal point for maritime leaders to discuss pertinent issues and challenges faced by the maritime industry, in particular, that of Asia. The third *Sea Asia* show will be held from 12 to 14 April 2011 at Marina Bay Sands, Singapore.

The *Sea Asia 2011* show is an iconic maritime show that epitomizes the camaradie and strong tripartite partnership between the organisers, SMF and Seatrade, the key maritime players and the Maritime and Port Authority of Singapore. As part of the launch party, Mr Michael Chia, Chairman of Singapore Maritime Foundation and Mr Chris Hayman, Chairman of Seatrade will be delivering speeches. Mr Lam Yi Young, Chief Executive, Maritime and Port Authority of Singapore will also be onstage to officiate the launch of *Sea Asia 2011*, with Mr Chia and Mr Hayman. The venue for the launch party is kindly sponsored by Keppel.

International Conference Vision and Roadmap for R&D Priorities in Maritime Environment, Technology, Business, Policy and Security

Organised by Nanyang Technological University (NTU)

**29th – 30th April 2010, Singapore
Grand Ballroom, Level 3, Hilton Singapore**

Objectives

Deliberation and development of thematic R&D foci relevant to the Asian region with the aim of developing R&D roadmaps towards the establishment of a sustainable maritime cluster, with niche expertise areas in maritime environment, technology, business, policy and security.

Themes

Maritime Environment

Including various IMO related issues for shipping such as ballast water, ship waste, ship emissions, SOx & NOx and use of marine water; sustainable maritime environment including clean energy, carbon issues, and eco-shipping.

Maritime Business and Finance

Including maritime services, global strategy, port and shipping management, ship supplies, ship brokering, chartering, insurance, P&I, crew management, arbitration.

Maritime Economics and Logistics

Including port and shipping economics, port and terminal operations, global supply chains, multi-modal transport logistics, logistics of ship supplies and bunker services.

Maritime Policy and Security

Examining ways to promote good order at sea in Asia; exploring the historic attributes of the sea and how regional naval modernisation could jeopardise safety and security, and look at the need for forging an integrated response to maritime security.

Maritime Technology

Including sensor development, ship routing, maritime hydrodynamics, maritime structures, energy and mineral resources, remote sensing, and international data network, supported by virtual reality and augmented reality visualisation.
