Shipping Community
Harbour Craft Community
Pleasure Craft Community

INCREASED PENALTIES FOR USE OF E-VAPORISERS IN SINGAPORE FROM 1 SEPTEMBER 2025

This Port Marine Circular serves to inform the community that the Singapore Government is stepping up enforcement against the use of e-vaporisers, especially against the emerging trend of e-vaporisers containing harmful substances such as etomidate.

2. From 1 September 2025, individuals caught possessing, using, or purchasing e-vaporisers will face higher penalties, and recalcitrant users may be required to undergo rehabilitation. In particular, with the listing of etomidate as a Class C Drug under the Misuse of Drugs Act 1973 (MDA), etomidate e-vaporiser offenders will face stiffer penalties, and those who import, sell or distribute etomidate e-vaporisers will also face prosecution and much higher penalties under the MDA.

3. Foreigners who visit or live in Singapore must abide by Singapore laws. This is also applicable to ships' crew calling at the Port of Singapore. Foreigners who are found in possession of e-vaporisers will have their e-vaporisers seized and be issued a Notice of Composition. Repeat offenders will face more severe consequences. Short-Term Visit Pass holders who re-offend will be banned from re-entering Singapore upon departure. Those on a long-term pass or immigration facility may also have their pass or immigration facility revoked on a third offence, and be deported and banned from re-entering Singapore thereafter. Foreigners caught possessing or using etomidate e-vaporisers, or who test positive for etomidate may have their pass or immigration facility revoked and be deported and banned from re-entering Singapore.

4. Government agencies have increased the conduct of enforcement operations across air, land, and sea checkpoints in Singapore.

5. For more information on the enhanced measures, please refer to the joint media release by the Ministry of Health, Singapore and the Ministry of Home Affairs, Singapore, at <https://www.moh.gov.sg/newsroom/whole-of-government-efforts-to-tackle-vaping/>.
