# SYSTEM OF UPDATING

Revised editions of Symbols Abbreviations Terms and S-57 Objects are published as necessary to show symbols which have been newly introduced and to record other developments in charting practice.

The more important changes introduced between editions are issued in Singapore Notices to Mariners as consecutively-numbered amendments. On receipt of these amendments the appropriate changes should be made as instructed and a record to the amendment noted in the table below.

Copies of Singapore Notices to Mariners can be obtained from the MPA website:  
[http://www.mpa.gov.sg/sites/port\\_and\\_shipping/circulars\\_and\\_notices/singapore\\_notices\\_to\\_mariners\(ntm\).page](http://www.mpa.gov.sg/sites/port_and_shipping/circulars_and_notices/singapore_notices_to_mariners(ntm).page)

## NOTICES TO MARINERS

The Maritime and Port Authority of Singapore gratefully acknowledge having used INT 1 of the International Chart Series and UKHO Chart 5011 (Symbols and Abbreviations used on Admiralty Charts). We hereby expresses thanks to the German Hydrographic Office and The United Kingdom Hydrographic Office.

# INTRODUCTION

|  |   |
|--|---|
| Symbols Abbreviations Terms and S-57 Objects | This edition of Symbols Abbreviation Terms and S-57 Objects is based on the "Chart Specifications of the IHO" (International Hydrographic Organization), which came into force at the XIth International Hydrographic Conference 1982 in Monaco with later additions and corrections. The layout and numbering accords with the IHO version of Chart INT 1.   |
| General                                      | This publication contains Symbols Abbreviations Terms and S-57 Objects used on international as well as national charts of the Hydrographic Department, Maritime and Port Authority of Singapore (MPA). Symbols and abbreviations shown on navigational display systems using vector electronic charts may differ from those described in this document.  |
| Publication                                  | Additional information may be found in the publications "Singapore Tide Tables and Port Information." Information about features represented on charts can also be found in the following publications or their digital equivalents; Admiralty Sailing Directions; Admiralty List of Lights and Fogs Signals; Admiralty Tide Tables and Tidal Stream Atlases; Admiralty List of Radio Signals; Annual Notices to Mariners and IALA Maritime Buoyage System.   |
| Copyright                                    | Charts and publications issued by the Hydrographic Department, Maritime and Port Authority of Singapore are copyrighted in accordance with Copyright Act. Accordingly reproduction without a special permission is forbidden. Reproductions of any kind, including partial ones, are allowed only with the express permission of the Hydrographic Department, Maritime and Port Authority of Singapore. If foreign source material has been included in MPA charts, reproduction of any kind, including extracts, are allowed only with express permission of the hydrographic office involved. The source material used is listed under "the chart title" or in the Source Data Diagram. |
| Chart reference                              | Where the limits of larger scale charts or plans are shown, they should normally be used, as they contain further essential navigational information.   |
| Projection                                   | Standard charts are graduated on the Transverse Mercator projection.  |
| Planes of reference                          | The datum for sounding reductions (chart datum) and the plane of reference for heights (height datum) are given on nautical charts under "the chart title".   |
| Depths                                       | The units used are given under the title of the chart. The position of a sounding is the centre of the area covered by the figures. Soundings within the Port of Singapore and the waters within the Malacca and Singapore Strait Routeing System are shown in metres and decimetres in depths of less than 31 metres. All other depths are rounded down to whole metres.   |
| Heights above Chart datum                    | Underlined figures on rocks and banks which uncovers indicate height above chart datum. They are given metres and decimetres.   |
| Heights above height datum                   | Heights, including overhead clearance, are normally given in metres above Mean High Water Springs or Mean Higher High Water depending on the tidal regime; in places where there is no appreciable tide they are above Mean Sea Level. The position of height is normally that of the dot alongside it, thus .99. Parentheses are used when the figure expressing height is set apart from the object (e.g. when showing the height of a small islet).  |
| Vertical clearance                           | Vertical clearance is generally referred to high water. It is given from 0.1 to 10.0 in metres and decimetres and above that in whole metres.   |
| Bearings                                     | Bearings are given from seaward and refer to the true compass.  |

# Schematic Layout of Chart 1

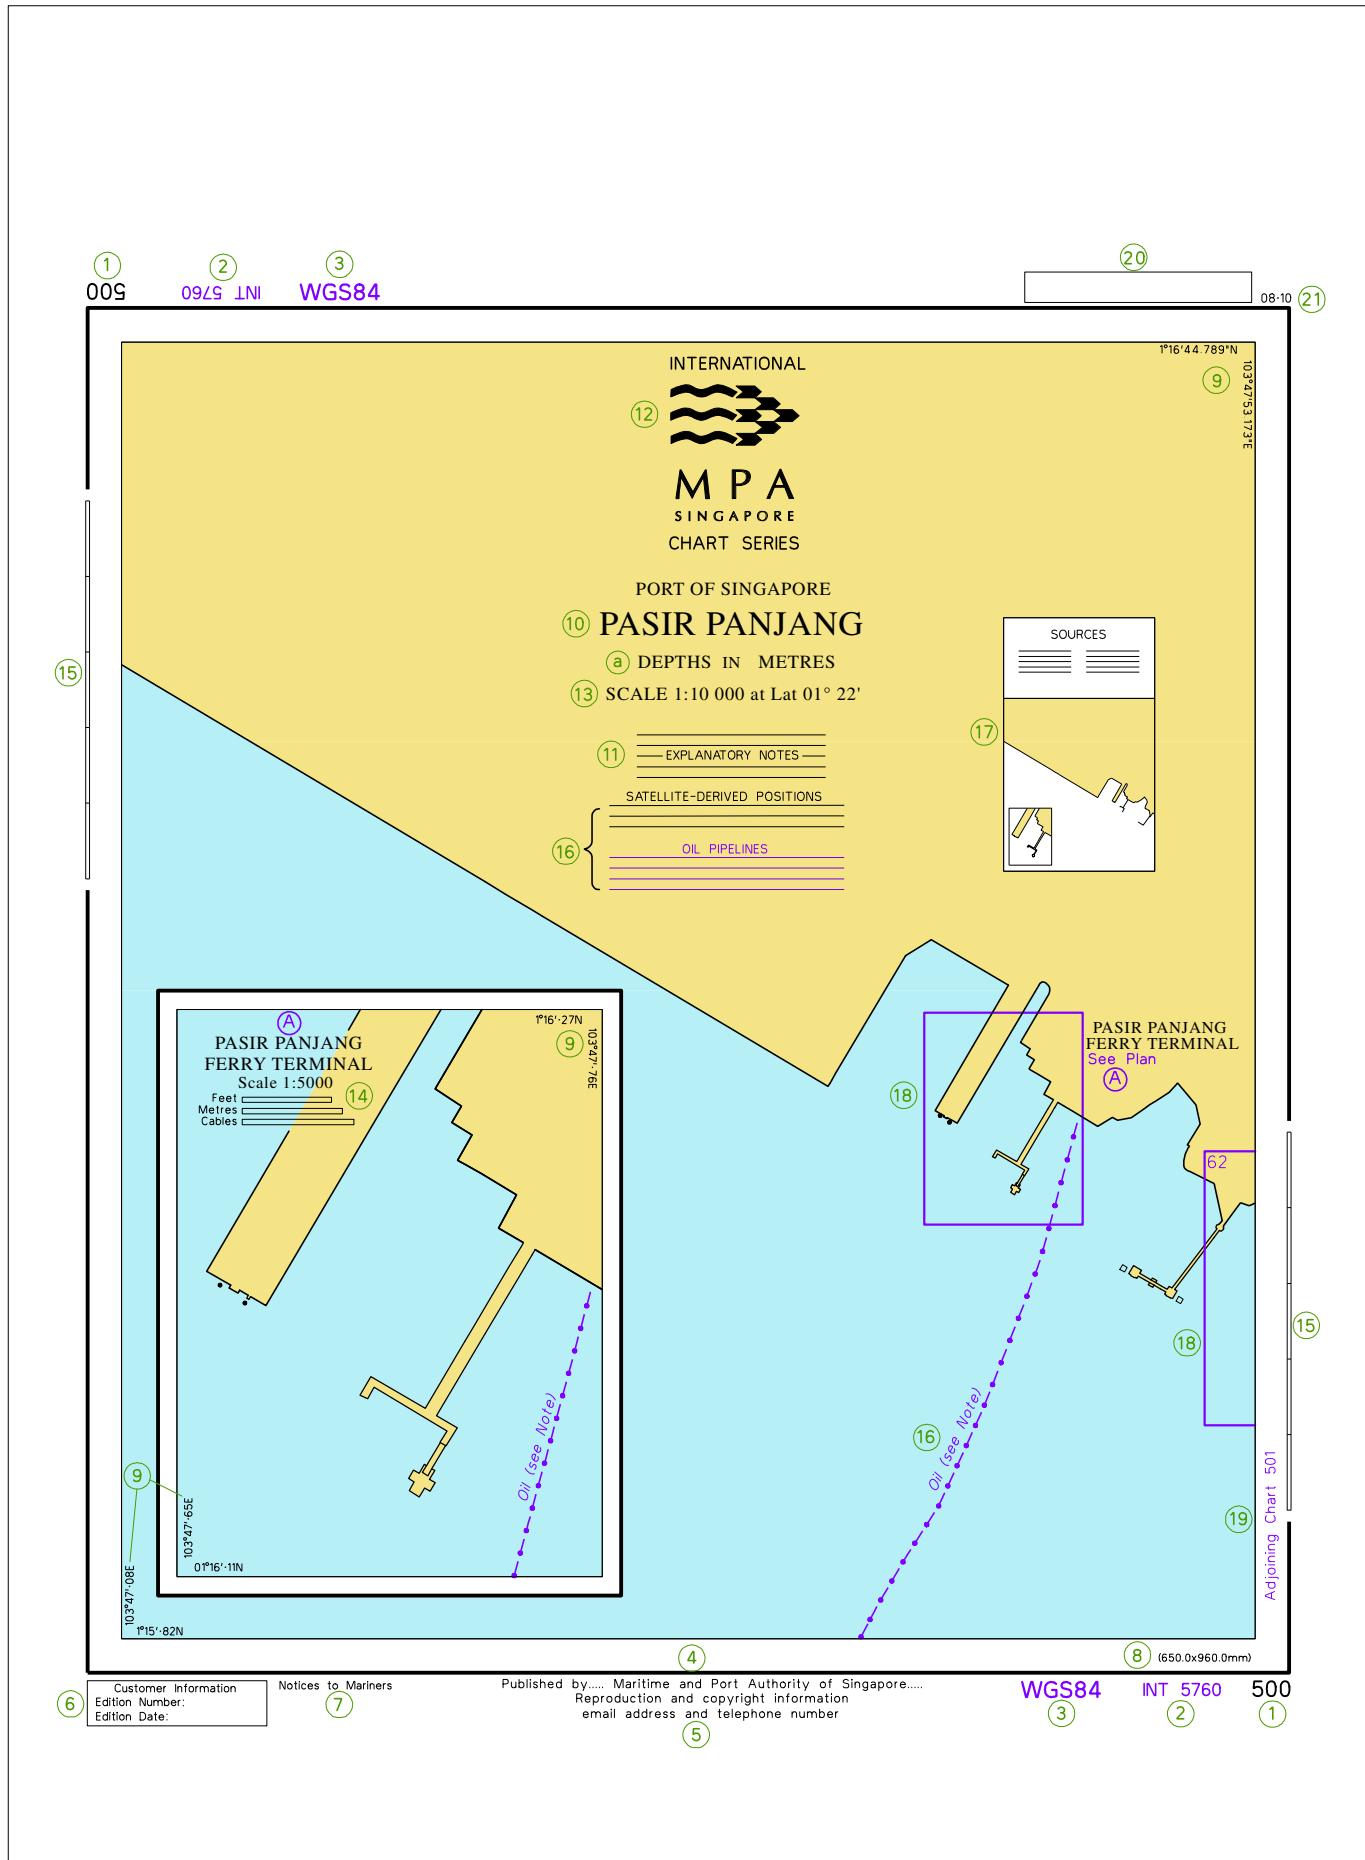

The diagram illustrates the schematic layout of Chart 1. At the top left is the section title "M Tracks, Routes". A legend on the left shows symbols for "Section" (1), "Section designation" (2), "Sub-section" (3), "Cross-reference to terms in other sections" (4), "Numbering following the International 'Chart Specifications of the IHO'" (5), "International (INT) symbols used on Singaporean charts" (6), "Term and explanation in English" (7), "S-57 Object classes and attributes" (8), "Not navigationally significant. Cross references to the 'Chart Specifications of the IHO' S-4 (Part B, unless a reference letter to another part is given)" (9), and "this representation or usage is obsolescent" (10). The main area contains a table entry for "Tracks". The first column (5) shows "1" with a note "(a)". The second column (6) shows two parallel lines with "270.5°" and "2Bns#270.5°". The third column (7) contains the text "Leading line (the firm line is the track to be followed)". The fourth column (8) contains "Tracks Marked by Lights → P" and "Leading Beacons → Q". The fifth column (9) lists "NAVLNE.CATNAV=3 ORIENT", "RECTRC.CATTRK=1 ORIENT.TRAFIC", and "433.1 433.2 433.3".

| Tracks |                       | Tracks Marked by Lights → P                              | Leading Beacons → Q  |
|--------|-----------------------|--|--|
| 1      | 270.5°<br>2Bns#270.5° | Leading line (the firm line is the track to be followed) | NAVLNE.CATNAV=3<br>ORIENT<br>RECTRC.CATTRK=1<br>ORIENT.TRAFIC<br>433.1<br>433.2<br>433.3 |

- (1) Section.
- (2) Section designation.
- (3) Sub-section.
- (4) Cross-reference to terms in other sections.
- (5) Column 1: Numbering following the International "Chart Specifications of the IHO". A letter in this column, e.g. a indicates a supplementary national symbol for which there is no International equivalent.
- (6) Column 2: International (INT) symbols used on Singaporean charts. Where both are shown, true to scale representations are to the left of symbols.
- (7) Column 3: Term and explanation in English.
- (8) Column 4: S-57 Object classes and attributes
- (9) Column 5: Not navigationally significant. Cross references to the "Chart Specifications of the IHO" S-4 (Part B, unless a reference letter to another part is given).
- (10) † means: this representation or usage is obsolescent.

## A Chart Number, Title, Marginal Notes

### *Schematic layout of an INT Chart (reduced in size)*

# Chart Number, Title, Marginal Notes A

| <i>Magnetic Features → B</i>  | <i>Tidal Data → H</i> |
|---|-----------------------|
| ① Chart number in the Singaporean series.   | 251                   |
| ② Chart number in the International (INT) Chart series.   | 251.1                 |
| ③ Use of WGS84 geodetic reference system.   | 201<br>255.3          |
| ④ Publication note (imprint) showing the date of publication as a New Chart.  | 252.1<br>252.4        |
| ⑤ Reproduction and Copyright acknowledgement note. All Singaporean charts are subject to Copyright restrictions.  | 253                   |
| ⑥ Customer Information, Edition Number, Edition Date.   | 252.2                 |
| ⑦ Notices to Mariners: the year dates and numbers of Notices to Mariners.   | 252.3                 |
| ⑧ Dimensions of the inner neat-lines of the chart border. In the case of charts on Transverse Mercator and Gnomonic projections, dimensions may be quoted for all borders of the chart which differ.  | 222.3<br>222.4        |
| ⑨ Corner co-ordinates.  | 214                   |
| ⑩ Chart title. This should be quoted, in addition to the chart number, when ordering a chart.   | 241.3                 |
| ⑪ Explanatory notes on chart content: to be read before using the chart.  | 242                   |
| ⑫ Seals. Where Singaporean chart is in the International Chart series, the seal of the International Hydrographic Organization (IHO) is shown in addition to the national seal. Reproductions of international charts of other nations (facsimile) have the seals of the original producer (left), publisher (centre) and the IHO (right). Reproductions of other charts have the seals of original producer (left) and publisher (right). charts which are co-productions carry the seals of the nations involved in their production. | 241.1<br>241.2        |
| ⑬ Scale of chart: on Mercator projection, at a stated latitude.   | 211<br>241.4          |
| ⑭ Linear scales on large-scale plan.  | 221                   |
| ⑮ Linear border scales (metres). On smaller scale charts, the latitude border should be used to measure Sea miles and Cables.   | 221.1                 |
| ⑯ Cautionary notes (if any) on charted detail: to be read before using the chart.   | 242                   |
| ⑰ Source Diagram (if any). If a Source Diagram is not shown, details of the sources used in the compilation of the chart are given in the explanatory notes (see 11). The Source Diagram or notes should be studied carefully before using the chart in order to assess the reliability of the sources.   | 290-298               |
| ⑱ Reference to a larger scale chart or plan (with reference letter if plan on same chart).  | 254                   |
| ⑲ Reference to an adjoining chart of similar scale.   | 254                   |
| ⑳ Note 'IMPORTANT - THE USE OF SINGAPOREAN CHARTS'.   | 243                   |
| ㉑ Printing date. Example : 08.10 (August 2010)  | 252                   |
| ㉒ Reference to the units used for depths measurement.   | 241.5                 |

# B Positions, Distances, Directions, Compass

| Geographical Positions |      |  |           |              |
|------------------------|------|--|-----------|--------------|
| 1                      | Lat  | <i>Latitude</i>  |           |              |
| 2                      | Long | <i>Longitude</i>   |           |              |
| 3                      |      | <i>International Meridian (Greenwich)</i>  |           |              |
| 4                      | °    | <i>Degree(s)</i>   |           | 130          |
| 5                      | '    | <i>Minute(s) of arc</i>  |           | 130          |
| 6                      | "    | <i>Second(s) of arc</i>  |           | 130          |
| 7                      | PA   | <i>Position approximate (not accurately determined or does not remain fixed)</i> | *QUAPOS=4 | 417<br>424.1 |
| 8                      | PD   | <i>Position doubtful (reported in various positions)</i>                         | *QUAPOS=5 | 417<br>424.2 |
| 9                      | N    | <i>North</i>   |           | 131.1        |
| 10                     | E    | <i>East</i>  |           | 131.1        |

# Tides, Currents H

|    | Vertical clearance → D   | Tide Gauge → T | Tidal Levels and Charted Data |
|----|--|----------------|-------------------------------|
| 20 | <p>NOTE : Planes of reference are not exactly as shown below for all charts. They are usually defined in notes under chart titles.</p> <p>* The safe vertical clearance to avoid risk of electrical discharge, has been obtained by applying a deduction to the physical vertical clearance of the cable above HAT. The deduction is variable and depends upon the transmission voltage.</p> |                | 302.2<br>380.1<br>405         |

‡ The term 'recommended' in connection with tracks and routeing measures does not imply recommendation by the Maritime and Port Authority of Singapore. It is usually by a regulatory authority, but may be established by precedent.

# M Tracks, Routes

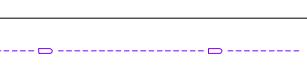

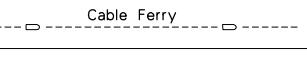

# Tracks, Routes M

| Examples of Routeing Measures (see diagram on page 34)  |  |
|---|--|
| (20.1)  | Traffic separation scheme (TSS). traffic separated by separation zone  |
| (20.2)  | Traffic separation scheme. traffic separated by natural obstructions   |
| (20.3)  | Traffic separation scheme. with outer separation zone. separating traffic using scheme from traffic not using it |
| (21)  | Traffic separation scheme. roundabout  |
| (22)  | Traffic separation scheme with "crossing gates"  |
| (23)  | Traffic separation schemes crossing. without designated precautionary area                                       |
| (24)  | Precautionary area   |
| (25.1)  | Inshore traffic zone (ITZ). with defined end limits  |
| (25.2)  | Inshore traffic zone. without defined end limits   |
| ‡ (26.1)  | Recommended direction of traffic flow. between traffic separation schemes  |
| ‡ (26.2)  | Recommended direction of traffic flow. for ships not needing a deep water route                                  |
| (27.1)  | Deep water route (DW). as part of one-way traffic lane   |
| (27.2)  | Two-way deep water route. with minimum depth stated  |
| (27.3)  | Deep water route. centre line shown as recommended one-way or two-way track                                      |
| ‡ (28.1)  | Recommended route (often marked by centre line buoys)  |
| (28.2)  | Two-way route with one-way sections  |
| (29.1)  | Area to be avoided (ATBA). around navigational aid   |
| (29.2)  | Area to be avoided. because of danger of stranding   |
| a   | Safety fairway   |

| Example of a full Light Description |  |  |  |      |
|-------------------------------------|--|--|--|------|
| 16                                  | Example of a light description on a metric chart using international abbreviations: ⚡ F(3)WRG.15s13m7-5M   |  |  | 4719 |
|                                     | FI(3) Class or character of light: in this example a group-flashing light, regularly repeating a group of three flashes.   |  |  |      |
|                                     | WRG. Colours of light: white, red and green, exhibiting the different colours in defined sectors.  |  |  |      |
|                                     | 15s Period of light in seconds, i.e., the time taken to exhibit one full sequence of 3 flashes and eclipses: 15 seconds.   |  |  |      |
|                                     | 13m Elevation of focal plane above height datum: 13 metres.  |  |  |      |
|                                     | 7-5M Luminous range in sea miles: the distance at which a light of a particular intensity can be seen in 'clear' visibility, taking no account of earth curvature. In those countries (eg United Kingdom) where the term 'clear' is defined as a meteorological visibility of 10 sea miles, the range may be termed "nominal". In this example the ranges of the colours are: white 7 miles, green 5 miles, red between 7 and 5 miles. |  |  |      |

# Buoys, Beacons Q

## Buoys and Beacons

IALA Maritime Buoyage System, which includes Beacons → Q 130

### General

|   |     |                            |                         |
|---|-----|----------------------------|-------------------------|
| 1 | —o— | Position of buoy or beacon | 455.3<br>460.1<br>462.1 |
|---|-----|----------------------------|-------------------------|

### Colour of Buoys and Beacons Topmarks

Abbreviations for colours (lights) → P 11

|   |  |  |  |  |
|---|--|--|--|--|
| 2 |  | Single colour: green (G) and black (B)   | BOYXXX<br>TOPMAR.TOPSHP.COLOUR=4/2           | 450<br>450.1<br>450.2<br>450.3<br>464<br>464.1<br>464.2<br>464.3 |
| 3 |  | Single colour other than green and black: red (R), yellow (Y), orange (Or)   | BOYXXX<br>TOPMAR.TOPSHP.COLOUR               |  |
| 4 |  | Multiple colours in horizontal bands: the colour sequence is from top to bottom  | BOYXXX.COLPAT.COLOUR<br>TOPMAR.TOPSHP.COLOUR |  |
| 5 |  | Multiple colours in vertical or diagonal stripes: the darker colour is given first. In these examples, red(R), white(W).                       | BOYXXX.COLPAT.COLOUR<br>TOPMAR.TOPSHP        |  |
| 6 |  | Retroreflecting material may be fitted to some unlit marks. Charts do not usually show it. Black bands will appear dark blue under a spotlight |  | 464  |

### Lighted Marks

Marks with Fog Signals → R

|   |  |  |                  |                       |
|---|--|--|------------------|-----------------------|
| 7 |  | Lighted marks on standard charts (examples)      | BCNXXX<br>BOYXXX | 457.1<br>466<br>466.1 |
| 8 |  | Lighted marks on multicoloured charts (examples) | BCNXXX<br>BOYXXX |                       |

### Topmarks and Radar Reflectors

For Application of Topmarks within the IALA System → Q 130

Radar reflector → S

|    |  |   |   |                                  |
|----|--|---|---|----------------------------------|
| 9  |  | IALA System buoy topmarks (beacon topmarks shown upright)   | TOPMAR.TOPSHP   | 463<br>463.1                     |
| 10 |  | Beacon with topmark, colour, radar reflector and designation (example)  | COLOUR.BCNHP.OBJNAM<br>TOPMAR.TOPSHP.COLOUR<br>CONRAD=3                     | 450<br>455.2<br>455.7            |
| 11 |  | Buoy with topmark, colour, radar reflector and designation (example)<br>Radar reflectors are not generally charted on IALA System buoys | BOYXXX.CONRAD=3<br>COLOUR.BOYSHP.OBJNAM<br>TOPMAR.TOPSHP.COLOUR<br>CONRAD=3 | 460.3<br>460.6<br>465.1<br>465.2 |

# Q Buoys, Beacons

| Buoys |  | Features Common to Beacons and Buoys → Q 1-11 |
|-------|--|---|
|       |  |   |

| Shapes |  |  |  |   |
|--------|--|--|--|---|
| 20     |  |  | Conical buoy, nun buoy, ogival buoy  | BOYXXX.BOYSHP=1<br>462 2                          |
| 21     |  |  | Can buoy, cylindrical buoy   | BOYXXX.BOYSHP=2<br>462 3                          |
| 22     |  |  | Spherical buoy   | BOYXXX.BOYSHP=3<br>462 4                          |
| 23     |  |  | Pillar buoy  | BOYXXX.BOYSHP=4<br>462 5                          |
| 24     |  |  | Spar buoy, spindle buoy  | BOYXXX.BOYSHP=5<br>462 6                          |
| 25     |  |  | Barrel buoy, tun buoy  | BOYXXX.BOYSHP=6<br>462 7                          |
| 26     |  |  | Superbuoy Superbuoys are very large buoys, e.g. a LANBY (P6) is a navigational aid mounted on a circular hull of about 5m diameter. Oil or gas installation buoys (L16) and ODAS buoys (Q58), of similar size, are shown by variations of the superbuoy symbol | BOYXXX.BOYSHP=7<br>445 4<br>460 4<br>462 9<br>474 |

| Minor Light Floats |  |  |                                     |                          |
|--------------------|--|--|-------------------------------------|--------------------------|
| 30                 |  |  | Light float as part of IALA System  | LITFLT.COLOUR<br>462 8   |
| 31                 |  |  | Light float not part of IALA System | LITFLT.MARSYS=9<br>462 8 |

| Mooring Buoys |  | Oil or Gas Installation Buoy → L                           | Visitors' (Small Craft) Mooring → U  |
|---------------|--|--|--|
| 40            |  | Mooring buoy   | MORFAC.CATMOR=7.BOYSHP<br>4315   |
| 41            |  | Lighted mooring buoy (example)                             | MORFAC.CATMOR=7<br>BOYSHP=6<br>LIGHTS.LITCHR.COLOUR<br>SIGPER.SIGGRP<br>4315<br>466 1<br>466 2<br>466 3<br>466 4 |

# Q Buoys, Beacons

## 130 IALA Maritime Buoyage System

IALA International Association of Marine Aids to Navigation and Lighthouse Authorities

M\_NSYs  
MARSYS=1,2

NP 735

Where in force, the IALA System applies to all fixed and floating marks except landfall lights, leading lights and marks, sectorized lights and major floating lights.

The standard buoy shapes are cylindrical (can) , conical , spherical , pillar , and spar , but variations may occur, for example minor light floats .

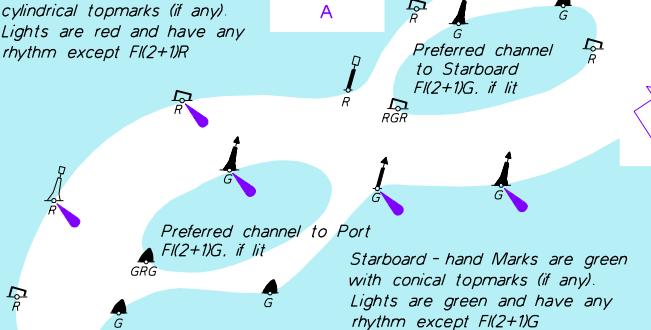

In the illustrations below, only the standard buoy shapes are used. In the case of fixed beacons (lit or unlit) only the shape of the topmark is of navigational significance.

### 130.1 Lateral marks

are generally for well-defined channels. There are two international Buoyage Regions - A and B - where Lateral marks differ.

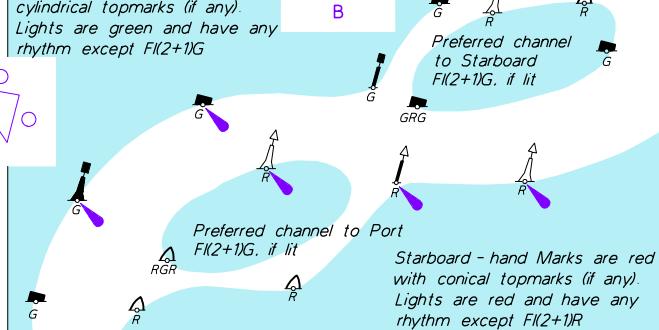

Port-hand Marks are red with cylindrical topmarks (if any). Lights are red and have any rhythm except Fl(2+1)R

#### REGION A

Port-hand Marks are green with cylindrical topmarks (if any). Lights are green and have any rhythm except Fl(2+1)G

#### REGION B

A preferred channel buoy may also be a pillar or a spar. All preferred channel marks have three horizontal bands of colour.

BOYLAT, BOYSHP, CATLAM, COLOUR, COLPAT, LIGHTS, COLOUR, LITCHR, SIGGRP, SIGPER

### 130.2

Symbol showing direction of buoyage where not obvious

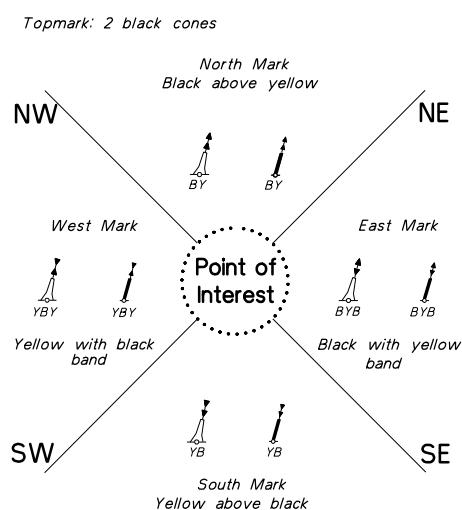

Symbol showing direction of buoyage where not obvious, on multicoloured charts (red and green circles coloured as appropriate).

### 130.3 Cardinal Marks

indicating navigable water to the named side of the marks. Cardinal marks have the same meaning in Regions A and B

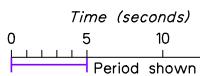

BOYCAR

#### UNLIT MARKS

#### LIGHTED MARKS

White Light

North Mark  
Black above yellow

VO or Q

*Marina Facilities may be tabulated on harbour charts and large scale coastal charts.*

*● indicates that the facility is available at the marina itself. Laundrettes etc. located outside the marina are not included. The facilities may not be available outside normal working hours. All marinas have water, toilets and rubbish disposal.*

### **Corrections**

*Information on small craft (leisure) facilities will be updated as charts are revised by New Edition. The Hydrographic Department, Maritime and Port Authority of Singapore would be pleased to receive reports of alterations or additions to small craft facilities.*
