(See more at: www.edoxonline.com)
Brief description of proposed Solution and key attributes	<ul style="list-style-type: none"> • edoxOnline streamlines and automates post-trade execution processes. Our proprietary technology enables the electronic issuance and secure validation of Supervision, Origin, Fumigation and many other certificates. • The eBL module allows for issuance, handling and management of electronic Bills of Lading, enabling a secure and convenient trade while saving considerable amounts of time and money. • We are glad to support Singapore and other countries towards the adoption of eBLs solutions through sharing our expertise and/or making edoxOnline technology available through: <ul style="list-style-type: none"> ○ Title Transfer Interoperability: We can work on ad-hoc interfaces using TradeTrust or other possible options to facilitate interoperability across digital ecosystems ○ Compliance to MLETR & leveraging legislative framework: Our T&Cs and system processes are aligned with and comply to MLETR, available for stakeholders' review. We are also open to offer legislative frameworks like that of Singapore that have already adopted MLETR. Currently, we are also participating in England & Wales' Law Commission's exercise on Law Reform for the Digitalisation of Trade Documents. ○ Industry Standards: We are part of the Standards working groups led by DCSA, FIATA and likely to join BIMCO's new working group on global eBL standards for bulk shipping.
Support required	Onboard supply chain players (e.g. carriers, shippers, traders, consignees, freight forwarders, logistics providers, financiers to our solution)
