Overview

The SMU Academy Enterprise Risk Management Programme is designed and developed by established industry subject matter experts, practitioners of governance, risk management & compliance.

This programme is aligned to global best practices and the Risk Management Society's RIMS-Certified Risk Management Professional curriculum and also provides a road map for participants to progress in their career paths through the RIMS-CRMP certification route. The SMU Enterprise Risk Management programme is application focussed and the curriculum is supplemented with real Asian case studies.

What Will Be Covered

- Understand enterprise risk management (ERM) fundamentals
- B.Analyse business operations
- C.Describe organisation's value chain
- D.Identify organisational uncertainties
- E.Develop organisational risk strategy approach
- F.Define organisational risk competency
- G.Establish risk governance framework and culture
